Professional Summary

Computer Science and Mathematics graduate with hands-on experience in Machine Learning, Deep Learning, and LLM application development. Skilled in Python, LangChain, LangGraph, RAG, AI Agents, MCP, and Vector Databases. Experienced in building intelligent chatbots and AI-powered workflows using modern Generative AI frameworks. Strong analytical and problem-solving abilities with a passion for learning and applying emerging AI technologies.

Education

Bachelor of Science in Computer Science and Mathematics,
Faculty of Mathematical Sciences and Informatics University of Khartoum

Skills

Programming

Python, SQL

AI & Machine LearningMachine

Learning, Deep Learning(Pytorch), Transformers, NLP, Neural Networks

Backend & APIs

FastAPI, REST APIs

LLM Engineering

LangChain, LangGraph, RAG, CrewAI, MCP, Prompt Engineering, AI Agents

Databases

MySQL, ChromaDB, FAISS Vector Databases

Tools & Libraries

NumPy, Pandas, Scikit-learn, Matplotlib

Projects

Comparing SHAP vs. LIME for Model Interpretability in Financial Credit Scoring

Compared SHAP and LIME interpretability methods on machine learning credit scoring models to analyze prediction explanations, stability, and transparency in financial risk assessment.

AI Email Assistant Agent

Python, LangGraph, CrewAI, Gmail API, LLMs

- Built an AI email assistant that analyzes incoming emails using LLMs.
- Developed a LangGraph and CrewAI multi-agent workflow for email classification and response planning.
- Automated Gmail draft creation for actionable messages through Gmail API integration.
